2.1 Please write your comments, positive and/or negative, that point out specific good or bad features of instruction in this class. Your constructive comments can be helpful to the instructor and to the department in improving the quality of instruction.

Comments
This guy was awesome answered all my questions was funny and entertaining while still holding up to teacher expectations. He really knew how to talk and explain to the students and was helpful throughout the whole semester.
Ryan was a great instructor this semester for Lab. He offered to help anyone and everyone in class, no matter how small the issue was. At some points, the class was ahead of our physics lecture material, but he bridged the gap really well.
Good professor makes the labs very clear
Extremely helpful explanations. I think he should consider becoming a physics professor because even just his few minute explanations in the beginning of the lab were extremely helpful and let me understand concepts from the lecture immediately. He also always goes around and helps everyone in the lab and is very friendly. Best lab instructor I've had.
Great nice
