2.1 Please write your comments, positive and/or negative, that point out specific good or bad features of instruction in this class. Your constructive comments can be helpful to the instructor and to the department in improving the quality of instruction.

Comments
He's good at teaching.
Ryan was an exceptionally good teacher due ot his infectious passion for the subject and openness towards helping everyone in the classroom. He never put anyone down or made them feel lesser for asking questions, and would actively monitor the classroom to ensure that everyone had a handle on any given lab. His deep understanding of the subject allowed him to explain more difficult topics into digestible parts for any student who might have been struggling.
Pretty good and chill instructor, he explained things to what they needed to be
Maybe there can be group quizzes
N/A
The lab instructions were a little bit confusing to figure out, especially the set ups. Otherwise, the Mr. Johnson was very kind and willing to help my partners and I figure out what we needed to do or to set up the circuits for us.
Is very helpful during labs and sets up examples needed for them.
I thought Ryan was a great help during this lab and he really knew what he was doing.
